Information about Copyrighted Content

Some instruments administered as part of this study may contain in whole or substantially in part contents from copyrighted instruments. Reproductions of the instruments are provided as documentation for the analysis of the data associated with this collection. Restrictions on "fair use" apply to all copyrighted content. More information about the reproduction of copyrighted works by educators and librarians is available from the United States Copyright Office.

NOTICE

WARNING CONCERNING COPYRIGHT RESTRICTIONS

The copyright law of the United States (Title 17, United States Code) governs the making of photocopies or other reproductions of copyrighted material. Under certain conditions specified in the law, libraries and archives are authorized to furnish a photocopy or other reproduction. One of these specified conditions is that the photocopy or reproduction is not to be "used for any purpose other than private study, scholarship, or research." If a user makes a request for, or later uses, a photocopy or reproduction for purposes in excess of "fair use," that user may be liable for copyright infringement.

ICPSR PROCESSING NOTES FOR # 26143
CBS News/New York Times Monthly Poll, February 2008

- 1) **Variable format:** The **CASEID** variable was reformatted in order to make it a unique identifier.
- 2) **Corrected value labels:** Code 38 in **Q2** originally had a value label of "The President/Bill Clinton/Leadership." This value label was changed to "The President/Leadership" so that it would refer to the president in office at the time of the survey. Truncated value labels in the variable **EDUC** were corrected.

Data Completeness Report

Notes: (1) Variables are individually listed only if they have greater than 5% missing data. These variables are listed under the appropriate percentage category in the order in which they appear in the data file. (2) The Data Completeness Report only captures information about system missing or other values that are declared missing. Codes that have a label implying that they are missing but that are not declared missing values are not reflected in this report. Data users should consult the codebook for more specific information about missing values. (3) Some variables that have 100% missing data may have been blanked by ICPSR to protect respondent confidentiality. Data users should consult the codebook for more specific information about blanked variables. (4) Data do not contain skip patterns or skip patterns are not reflected in the data as coded.

ICPSR APPENDIX FOR # 26143
CBS News/New York Times Monthly Poll, February 2008

The codes listed in the appendix provide the complete listing of states (including the District of Columbia) composing the Census Region and CBS Region (variables **CENR** and **CBSR**, respectively, in the codebook), as well as the state codes composing the CBS State Code (variable **STCD** in the codebook).

Additionally, a description of weight variables from the original documentation is also included. Due to the reformatting of the data file, the column locations of these variables are no longer valid.

NOTE: Census region codes parallel CBS region codes with one exception: Delaware, District of Columbia, Maryland, and West Virginia are coded as South, not Northeast.
